

Eyes on the Prize

Play your cards in the right order to snag the big prizes

Overview

2-6
players

25
mins

Age
8+

Secretly choose one card then simultaneously reveal. The player who played the highest unique number wins the trick. The lower the winning card, the more powerful it is.

Winning a trick guarantees you a prize... but can you make it a good one... and can you hang onto it?

Components

- 49 cards
- A method of scoring

Features

Bluffing

Trick taking

High tension

How to Play

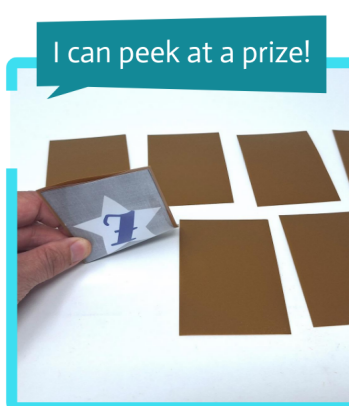

Each player has an identical set of cards - the numbers 1-7.

All players secretly choose one card and reveal simultaneously.

The player who played the highest unique card wins the trick.

The winning card tells the player which prize actions they can perform. The lower the card, the more powerful the action.

Winning a trick will always allow you to take a prize from the randomised face down line of cards. But you may also be able to swap prizes, peek at prizes, reveal prizes or even steal a prize from another player.

Players gain information as they progress through the round. Which could be valuable! Be careful - some prizes are worth negative points!

Keep playing until one player reaches 50 points.
