

Ready, Steady, Flamingo!

The fussy flamingos are here and they want to stay at your resort!

Overview

Be the best at placing flamingos in your resort!

Each round a flamingo goal is set by turning over three ready, steady, flamingo cards. Players race to position the correct number of flamingos from the lagoon, in the correct formation and location, based on the current cards.

The fastest player wins the round and gains points but now has fussy VIP flamingos to deal with!

Will you try to smuggle in secret mafia flamingos for extra points, or accuse the other players of doing the same?

After 6 rounds of increasing difficulty the game is over and the player with the most points is the winner!

The Flamingos

Regular Flamingos

know where they want to be - but there's a lot to deal with!

VIP Flamingos

wear sunglasses and can't be with the regular flamingos - they have their own special goal!

Mafia Flamingos

have a secret mark! Can you smuggle them in without being caught for extra points?

The Goals

Rounds 1-3: 1 Goal
