HOW TO PLAY

Blind bid for turn order. Add your turn order marker from the last round. 4th last round? Now you have an advantage.

Place workers on the action board to select the actions you will take. Then actions are executed in player order.

Draft ground tiles, feature tiles and animal tiles and place them in your garden. You may have to pay the gnome for the tile you want.

Score objective cards for the combination of tiles you have in a specific area of your garden.
